

Time Monitoring

Activate and see time passing with a Timestrip®. Our range of 9 indicators include 15 time lapse markers.

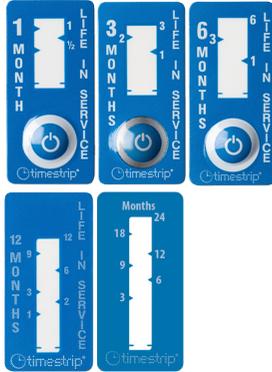

Short Time Indicators

from 1 Hour to 7 Days, our short time indicators are perfect for medical testing

Time Indicators

from 1 to 24 Months, our standard line of time indicators are used in medical devices, for product replacement cycles, with consumables, for appointment reminders, cosmetics, industrial filters and on promotional materials.

Custom indicators can be created with a unique monitoring time and your own branding.

Stocked Solutions

Innovation remains a core strand of our approach to solution development and the practical application of our patented, low-cost smart label indicators.

We have created a core product range which we hold in stock ready for quick shipment.

Custom Solutions

Our customisation capabilities open up endless possibilities for product design integration to create solutions where our fail safe indicators replace the need for expensive and unstable electronic components.

We have the capability to print batch numbers or serial numbers onto individual indicators, to make time and temperature monitoring an integral part of Standard Operating Procedures.

the smart way to measure time & temperature

Time and Temperature Monitoring Solutions

What we do

Timestrip is an agile technology business that designs and manufactures time and temperature indicators.

Timestrip Enabled™ products drive changes in supply chain standard operating procedures and consumer behaviour, which in turn leads to greater brand loyalty, a better rate of sale and a built-in value added proposition to products carrying our mark of innovation.

For Use in

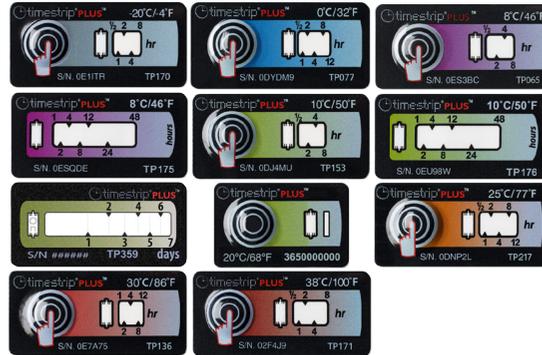

- Blood Banks
- Clinics
- Medical Devices
- Medical Testing
- Pharmaceuticals
- Vaccinations
- Veterinary

Temperature Monitoring

Inert until activated, irreversible threshold indicators. Complete can be customized to monitor any ascending and descending temperature breach.

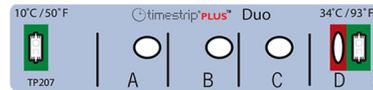

Timestrip® PLUS

Monitoring a range of ascending temperature thresholds from -20°C to 38°C.

Timestrip® PLUS Duo

Monitoring two ascending temperature thresholds, our stock indicator monitors 10°C and 34°C simultaneously.

Temperature Solutions

Inert until activated, irreversible threshold indicators. Complete can be customized to monitor any ascending and descending temperature breach.

Timestrip® Blood Temp

Monitoring 6°C and 10°C. Our Blood Temp 10 indicator has FDA 510(k) #BK150289 certification.

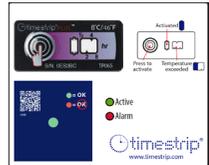

Timestrip® Food Temp

Perfect for seafood, shellfish and food shipping. Food Temp indicators monitor 3°C, 5°C, 8°C & 10°C.

Timestrip® Complete Card

Simultaneously monitors ascending and descending breaches on a convenient carrying card. Perfect for 2 - 8°C cold chain monitoring.

How it Works

Our indicators are activated by applying finger pressure to a blister filled with liquid dye. The temperature indicators show you the product is "ON" after activation. Once a temperature threshold is breached, the indicator window fills with dye, showing the cumulative time the indicator was exposed to dangerous temperatures.

Time indicators show you the amount of time since activation. After finger activation, the indicator window continually fills with dye to show you elapsed time.
